

**Women in Robotics Breakfast Program**  
**Friday, June 21, 2019**  
**7:00am – 8:00am**

Chair: Aileen Caceres, MD, MPH, FACOG

Co-Chair: Darla Hutton

**Title: Empowering Women on Journey of Adopting Robotics in Their Practice: Overcoming the Hurdles**

We will present information on robotics across the specialities and its adoption rate by women across these specialities. We will explore the challenges and roadblocks to incorporating robotics into practice for women across spectrums of training; from residency to advanced practice. This session is geared for everyone who is invested in developing robust robotic programs supporting female providers and also help female surgeons identify their growth potential.
